6.0	Liam Morrissey	August 2022	03/07/2023	

Introduction

1. SCCU's policy is to maintain the continuity of its activities, systems, facilities, and processes and where these are disrupted by any event, to enable it to return to 'normal' operations as soon as possible, taking fully into account the impact of any delay on SCCU's quality of service, reputation, and finances.

Scope

- 2. This policy applies to all SCCU venues, offices, operations, activities, and services, without exception, and all SCCU staff at all levels of the organisational structure and includes self-employed contractors.
- 3. All SCCU activities wherever conducted must comply with the requirements of this Policy.

Objectives

- 4. This policy is intended to ensure:
 - The concept of business continuity and our policy and approach is understood by all stakeholders.
 - Internal and external dependencies on customers, suppliers, partners, and resources implications are identified.
 - SMT and Directorate plans are developed to ensure recovery continuity is assured to an acceptable level in the event of an interruption to services.
 - Plans are systematically maintained and tested.
 - A programme of training and communication is put in place.
- 5. The objectives of business continuity planning are to ensure that SCCU:
 - Understand its critical activities and maintains the capability to resume operations within agreed timeframes, following the deployment of a contingency planning response.
 - Increases resilience by protecting critical assets and data (electronic and otherwise) through a coordinated approach to management and recovery.
 - Minimises impacts using a focused, well-managed response activity.

Requirements

6. SCCU requires:

- The Senior Management Team (SMT) holds the responsibility to recover generic facilities, corporately managed systems, and central data security; and
- The maintenance of a Major Incident Plan to guide the team on the recovery from major incidents. This includes call-out arrangements and operational requirements, and the plan must be subject to testing at least bi-annually.
- The SMT and directorate are responsible for maintaining a register of all local specialists, facilities equipment, and data, carrying out a business impact analysis (BIA) and setting parameters on acceptable recovery times for each.
- Directorate management teams are responsible for completing a Business Continuity Plan (BCP) in response to their BIA.
- Registers, BCP's and BIA's must be reviewed annually or following invocation of a plan to implement any lessons learnt.
- The directorate is responsible for the delivery of generic facilities which should undertake a BIA and BCP for all facilities provided through them.
- 7. In compiling plans due consideration must be given to:
 - Taking all reasonable measures to prevent and avoid any disruption to normal operations.
 - Taking all reasonable measures to prevent and avoid any disruption to normal operations.
 - Considering continuity planning and resilience implications in all processes, projects, change and system developments.
 - Making advance arrangements for the recovery of infrastructure components (e.g., accommodation, transport, telecommunications, equipment, and supplies).
 - Making advance arrangements to re-locate or re-organise operations to allow critical processes to continue.
 - Providing resilience for information systems and data, or alternative ways of working in the event of their failure. All new systems and processes to be in line with Policy.

- Protecting staff, students, visitors and third party welfare during and following an incident.
- Ensuring the effectiveness of plans and recovery arrangements through robust and regular testing and training.
- Updating plans following significant changes to contingency planning requirements. Such changes may occur as part of organisational change planning and management.
- Ensure resilience by using alternative communication channels such as phone, email, and social media to contact staff, learners, and stakeholders.
- The use of cloud-based business-critical systems ensures resilience by limiting downtime of systems and accessed anyway with Wi-Fi or 4G tethering.
- 8. Individual responsibilities and actions to ensure that SCCU can continue to deliver education and training following disruptive events are described in Annex A.

Approval and Review

9. Business Continuity policy approved by the SMT in January 2019.

Annex A: Business Continuity Responsibilities

Category	Actions	Responsibility	When	Outcome
Paperwork retention	Scan existing SCCU enrolment documentation. Store in the cloud and electronic media kept off-site.	MIS	End August 2019	Electronic media containing scanned documents stored offsite for access anywhere E-portfolio provider manages data storage
	Future enrolment documentation and portfolios to be stored electronically using OneFile.			and is subject to their internal Business Continuity processes.
Data access	MIS system is hosted off-site by Provider. Staff can access PICS / OneFile / Impact / Cognassist off-site for apprenticeship delivery. Enrolment packs are available online for further enrolment	MIS	In place	Cloud-based software suppliers required for apprenticeship delivery manage their data storage and outages are subject to their internal Business Continuity processes and software/data backup in line with the latest ISO regulations.
Software	All software is web- based and available with a Wi-Fi connection or 4G hotspot tethering. No need for connection to the internal IT network.		In place	Cloud-based software suppliers required for apprenticeship delivery manage their data storage and outages are subject to their internal Business Continuity processes and
